

## Service visits & rates

watkins

**Competitive servicing  
and maintenance for your  
heating system provided  
by industry specialists**

Watkins Plumbing Ltd are market leading Mechanical & Electrical Services providers delivering integrated end-to-end building solutions across London and the South East, but our services don't stop after installation.

Our maintenance division provides cost effective servicing for all heating systems, provided by professional, experienced and friendly engineers who will visit at a time to suit you. Whether you require a one-off visit, or an ongoing maintenance schedule, we can provide the services you need to keep your system in tip-top condition.

## Who can book a service?

Historically our maintenance services have been available to occupants of properties where C Watkins Plumbing Ltd has completed the M&E installation, but we are delighted to announce that due to the recent expansion of our service division, these services are now available to all landlords and residents in London and the South-East.

## Why book a service?

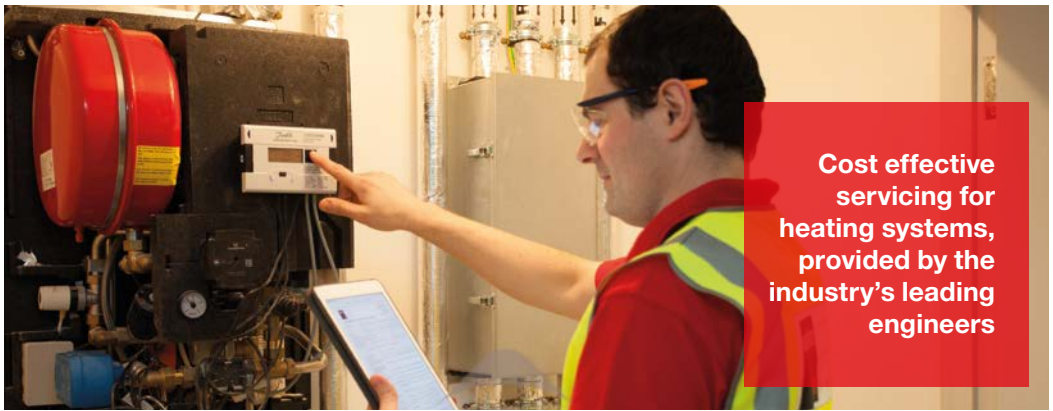

Regular maintenance is the best way to ensure your equipment keeps working as efficiently as it should. If you don't keep up with servicing, the system may not work correctly, leading to higher running costs or components wearing out more quickly. In addition, annual servicing allows engineers to spot potential problems before they arise, thereby avoiding the costly repair of a major failure.

## We'll help keep your home warm and comfortable

It's advisable to have a service every year not just to ensure your system is working efficiently but also to maintain your appliance warranty especially in the case of newly installed systems. Our dedicated customer service team are on hand to offer guidance on when these service visits should be scheduled and arrange appointments at your convenience.

- ✓ *Keep systems working efficiently*
- ✓ *Spot problems before they arise*
- ✓ *Avoid the costly repair of a failure*
- ✓ *Maintain your appliance warranty*
