

January 2024

Carbon Reduction Plan

Commitment to achieving net zero

C Watkins Plumbing Ltd. is committed to achieving net zero emissions by 2050.

Carbon emissions measurement

This year is the first we have measured and reported our carbon footprint. Our baseline emissions were measured by Carbon Link UK in accordance with the GHG Protocol Corporate Standard as specified in the Technical Standard for Completion of PPN06/21 Carbon Reduction Plans.

Baseline year: April 2022 - March 2023

Category	Emissions (tCO ₂ e)
Scope 1	78.012
Scope 2	20.253
Scope 3 (total)	275.405
4. Upstream transportation and distribution	27.594
5. Waste generated in operations	0.702
6. Business travel	172.342
7. Employee commuting	74.767
9. Downstream transportation and distribution	0*

Current year: April 2022 - March 2023

Category	Emissions (tCO ₂ e)
Scope 1	78.012
Scope 2	20.253
Scope 3 (total)	275.405
4. Upstream transportation and distribution	27.594
5. Waste generated in operations	0.702
6. Business travel	172.342
7. Employee commuting	74.767
9. Downstream transportation and distribution	0*

*C Watkins Plumbing Ltd. is a service-based business and does not ship any products.

Emissions reduction target

We are committed to reaching net zero emissions by 2050, a reduction of 100%. In future years, we aim to set interim targets potentially including bringing our net zero target forward.

Carbon reduction projects

- In order to reduce the emissions associated with our fleet, we are committing to phasing out fossil fuels in our fleet vehicles. Starting in 2025, we will change our fleet to electric vehicles at a rate of 10% per year, aiming to be fully electric by 2035. This will significantly reduce the carbon footprint of our day-to-day operations.
- To reduce the carbon footprint of our office space, we are changing our heating from gas to a heat pump system with battery storage.
- As business travel represents our largest emissions category, we have committed to implementing data tracking and monitoring practices to facilitate more detailed analysis of business travel-related emissions. This will allow us to have a clearer understanding of how we can reduce our travel-related emissions.
- We will engage heavily with our supply chain to promote net zero amongst our suppliers and subcontractors. This will be a crucial step in reducing our scope 3 emissions and we will encourage our partners to measure and report on their own carbon footprint to improve data quality and facilitate the overall reduction of emissions associated with our operations.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol Corporate Standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of C Watkins Plumbing Ltd.
